

INFORMATION AND PRICE CALCULATION FOR BOOKSHELF FREEDOM

The bookshelf Freedom is composed by independent solid wood modules to be stacked upon and put one next to the other thanks to special assembling hardware. To calculate the total size of the bookshelf please consider a distance of 3 mm bewtween each module, in width and height. The iron adjustable feet are 1 cm high. Only use modules 38 cm deep at the bottom of the composition to guarantee proper stability. Wall fixing with the provided hardware is recommended if the composition is higher than 154 cm. If it's higher than 240 cm please consider two fixing points: one in the middle and one on top.

At th moment of the order please provide a sketch of the required composition, indicating the number and type of modules.

The hardware for the first composition is always included in the price of the modules.

If you need further hardware to re-build the composition in a different way please refer to the article numbers and prices quoted in our price list.

TECHNICAL NOTES FOR BOOKSHELF FREEDOM

In oder to be able to stack them, all modules always have above and underneath standard holes for the hardware unless otherwise indicated in the order. Only in compositions with an height of 180 cm or less the upper modules aren't drilled above, so that the holes aren't visible on top. These modules will no longer be modular.

Bookshelf in solid wood, made up of modular components that can be stacked and pulled together using special mounting hardware. 1,5 cm solid wood and dovetail joints characterized each element. It can be fitted according to different furnishing needs by including backs, doors and drawers assembled with dovetail joints with push-pull opening system. Available with fixed or rotating TV panel, with cable housing. Available with "double face" elements, it can be used as room divider.
