

Prora

Mauro Lipparini

Prora is a table available both in the fixed or extending versions. The frame and central base are painted glossy white, matt white, matt anthracite grey or in steel or pickled metal; the table top and extensions are available in white painted or white acid-treated extra light glass or in black acid-treated glass. The two independent side extensions make it possible to increase the length of the table top easily, while retaining ultimate stability and solidity. In the fixed version, the top is available also in wood, in different finishes.
