

MODULA

INFORMATION AND PRICE CALCULATION FOR BOOKSHELF MODULA

The Modula system consists of blockboard boiserie panels completed by shelves and modules with drawers.

The boiserie panels are fixed to the wall through aluminium racks, 7 mm thick, already included in the price of the panels.

Shelves and modules with drawers are anchored to the racks by specific hardware, already included in the respective prices.

The shelves are 10 cm wider both on the right and on the left than the boiserie panels, to allow the anchorage.

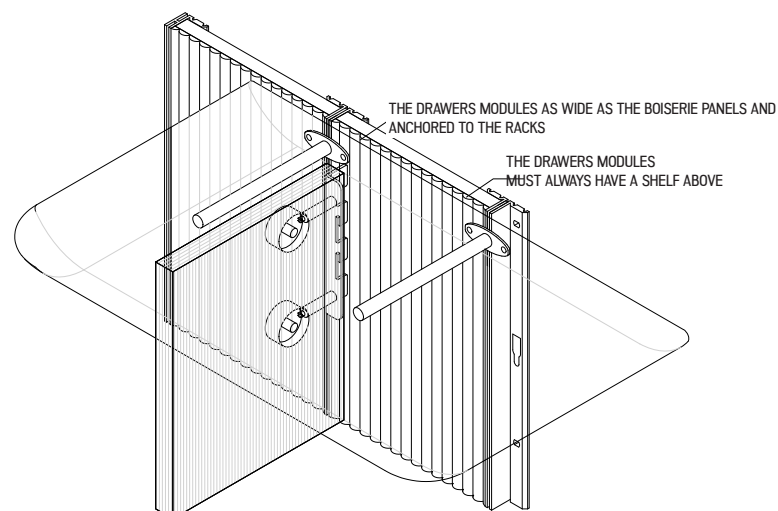

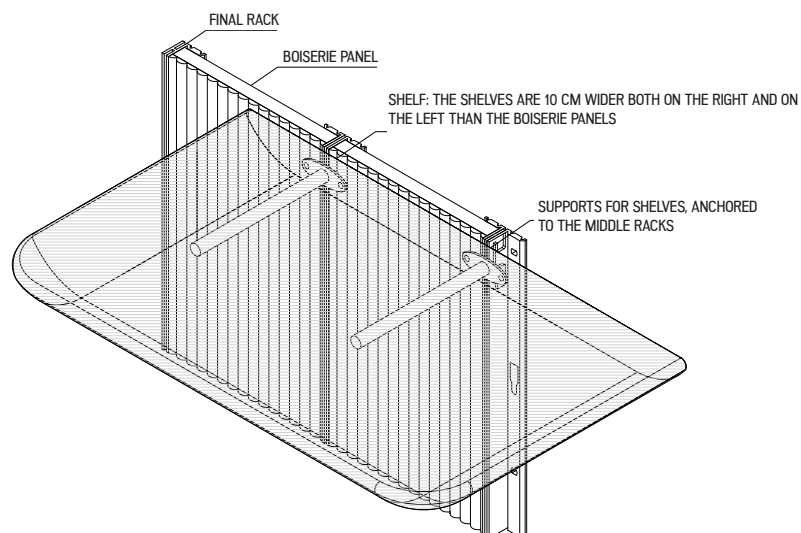

Modules with drawers must always be completed by an upper shelf, 40 cm deep.

LED lighting can be added under the shelves as well as above and below the boiserie panels. The transformer must be connected to a wall socket. If a different lighting system is desired, this must be specified in the order.

When calculating the total overall dimensions of the bookcase, consider 7 mm. thickness of the racks to the right and left of each boiserie panel.

For customized configurations of the system please check feasibility and price with the Sales Department.

BOOKSHELF ELEMENTS

Modular living system based on boiserie panels and completed by drawers and shelves.

Boiserie panels in veneered blockboard available also with special vertical processing, Fresart; shelves in veneered blockboard with bevelled and rounded edges; drawers with dovetail joints. Possibility to add LED strips to the boiserie panels and the shelves.
