► Le strutture degli arredi Camargue sono in alluminio, un materiale dall'elevata resistenza all'azione degli agenti atmosferici, pertanto non necessitano di copertura, benché sia comunque consigliato l'utilizzo delle apposite fodere per meglio preservare lo stato originale degli arredi. I cuscini di seduta e schienale dovranno tuttavia essere rimossi e ricoverati in luogo asciutto in caso di maltempo e durante la stagione invernale. La maggior parte dei componenti utilizzati per la realizzazione degli elementi Camargue può essere riciclata. *Made of aluminum, a material that is extremely weather-resistant, the Camargue structures do not need to be covered, although, to maintain their original condition, it is recommended that their respective covers be used. The seat and backrest cushions, however, must be removed and stored in a dry place during stormy weather and the winter season. Most of the components used in the Camargue seating elements can be recycled.*
