

BONALDO

Dorian

Designer: **Spazioameno**

The signature feature of the Dorian contemporary sideboard is the wide vertical groove highlighted in its doors. The sense of movement thus created by the doors of the Dorian sideboard breaks up the linearity of the wall on which it rests, thus adding visual appeal to the intrinsic function of the

sideboard. The doors and frame of this sideboard are made of wood, a material which adds elegance to the overall look, painted in white, bronze or lead finishes. The base is available in the version with two feet for a lighter visual effect or in the version with a plinth for a more compact look.
