FINISHES

As a family business that has been in operation since 1976, here at Fanuli, we understand there is no machine that can truly replace the beauty of a hand-made product. Crafting raw materials into Fanuli furniture, our artisans approach their design with honesty and inspiration from nature.

Each Fanuli sofa and lounge chair is crafted to order in Australia with the utmost care and precision, all while expressing contemporary ideas through quality materials. Using Australian hardwood frames, our sofas are made to be loved and enjoyed every day, finished with careful detailing that keeps them looking their best for many years.

CUSHIONS

Each cushion is constructed using a high resilient, high-density core. Duck feathering is wrapped around the core and in certain areas, high quality down is used, providing a soft feeling for lumbar support. Feathers are sanitised, and quills are cut, then heat-treated. The feather is combined with silicon-coated fibre balls, which repel the feathers, so they don't get entangled, allowing the cushions to maintain their shape for longer.

SUSPENSION

Sofa seat suspension is made using hardened steel springs which do not sag, while coated wire is connected to the springs for even suspension. This mechanism offers support that will withstand heavy use indefinitely, as opposed to inferior products which use webbing that has a much more limited lifespan.

FRAME

All frames are made using certified Victorian ash that have been kiln-dried, then screwed and dowed. Seat boxes are reinforced with right-angle solid blue steel supports. Every hardwood frame is hand-cut and sewn – there is no machinery or computers involved in the process, giving it a truly handcrafted status. All frames come with a lifetime guarantee.

UPHOLSTERY

Each piece of fabric or leather is individually hand-cut to allow for the tolerances and variation of every unique upholstery. No machinery or automated process are used, further exemplifying the 'made by hand' nature of our sofas.

A COMMITMENT TO SUSTAINABILITY

Over 75% of our materials are sourced from Australian suppliers and we are continuing to develop our approach to ethical and responsible sourcing.

We seek accredited certification standards from suppliers for materials where they exist, including those for timber, down, foam and organic cotton.

FOAM

100% of the foam we use is Sustainability Certified.

FEATHER & DOWN

100% of the feather and down used are sourced from certified source: Responsible Down Standard and the Global Organic Textile Standard.

TIMBER

100% of the timber from certified sustainable sources and have maintained a chain of custody accreditation under FSC and PEFC.

COTTON

100% of the cotton used is certified to the Global Organic Textile Standard.
