

Wall-mounted system for wineries or wine cellars, composed of veneered blockboard panels with solid wood supports that allow housing bottles of standard format, alternating with mirror modules with iron dust laquered metal frames. Special slanted display cases in solid wood allow to enhance the bottles. The lower part has larger spaces to accommodate large format bottles. Drawers assembled with traditional dovetail joints complete the structure allowing storage of what is needed for wine tasting. Possibility of backlighting the panels with LED profiles.

STANDARD COMPOSITION: SEE TECHNICAL DRAWINGS
